

Catenin-γ (731) polyclonal antibody

Catalog: BCP00349 Host: Rabbit Reactivity: Human, Mouse, Rat

BackGround:

The catenins, α , β and γ , are proteins which bind to the highly conserved, intracellular cytoplasmic tail E-cadherin. Together, the catenin/cadherincomplexes play an important role mediating cellular adhesion. α-catenin was initially described as an E-cadherin associated protein, and since has been shown to associate with other members of the cadherin family, such as N-cadherin and P-cadherin. β-catenin associates with the cytoplasmic portion of E-cadherin, which is necessary for the function of E-cadherin as an adhesion molecule. β-catenin has also been found in complexes with the tumor suppressor protein APC. γ-catenin, also known as plakoglobin, binds with α-catenin and N-cadherin. It has been shown that the transmembrane phosphatase PTPµ associates with catenin/cadherin complexes and may regulate complex signaling.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

~ 82 kDa

Swiss-Prot:

P14923

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500~1:1000 IHC: 1:50~1:200 IF: 1:50~1:200

Storage&Stability:

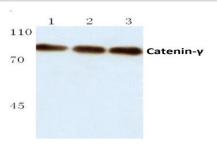

Store at 4 ℃ short term. Aliquot and store at -20 ℃ long

term. Avoid freeze-thaw cycles.

Specificity:

Catenin-γ (731) polyclonal antibody detects endogenous levels of Catenin-γ protein.

DATA:

Western blot (WB) analysis of Catenin- γ (731) polyclonal antibody at

1:500 dilution

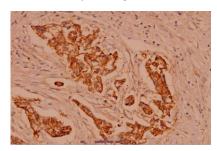

Lane1:AML-12 whole cell lysate(40ug)

Lane2:PC12 whole cell lysate(40ug)

Lane3:A549 whole cell lysate(40ug)

Lane4:H1792 whole cell lysate(40ug)

Lane5:HEK293T whole cell lysate(40ug)

Immunohistochemistry (IHC) analyzes of Catenin-γ (731) pAb in paraffin-embedded human breast carcinoma tissue at 1:100.
