

## Ezrin (M347) polyclonal antibody

Catalog: BCP00755

Host: Rabbit

Reactivity: Human,Mouse,Rat

### BackGround:

Ezrin, Moesin and Radixin belong to a family of highly homologous Actin-associated proteins that are localized just beneath the plasma membrane. The proteins are believed to be involved in the mediation of interactions between cytoskeletal and membrane proteins. Ezrin serves as a major cytoplasmic substrate of various protein-tyrosine kinases, including the epidermal growth factor receptor. Ezrin has also been identified as a cAMP-dependent protein kinase (A-kinase) anchoring protein and designated AKAP78. Moesin and Radixin share over 70% homology with Ezrin and are coexpressed within various cell types. Despite the high degree of homology, the three proteins exhibit a distinct receptor-specific pattern of phosphorylation.

### Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

### Molecular Weight:

~ 69, 81 kDa

### Swiss-Prot:

P15311

### Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB: 1:500~1:1000

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Specificity:

Ezrin (M347) polyclonal antibody detects endogenous levels of Ezrin protein.

### DATA:

Western blot (WB) analysis of Ezrin (M347) polyclonal antibody at 1:500 dilution

Lane1:HEK293T cell lysate

Lane2:HepG2 cell lysate

Lane3:Rat liver tissue lysate

Lane4:Mouse liver tissue lysate

Lane5:NIH-3T3 cell lysate

### Note:

For research use only, not for use in diagnostic procedure.
