

NDUFB9 (E134) polyclonal antibody

Catalog: BCP01169

Host: Rabbit

Reactivity: Human

BackGround:

NDUFB9 (NADH dehydrogenase (ubiquinone) 1 β sub-complex, 9), also known as LYRM3 or B22, is a 179 amino acid protein that belongs to the complex I LYR family. Localized to the inner mitochondrial membrane, as well as to the matrix side of the peripheral membrane, NDUFB9 functions as an accessory subunit of the multi-subunit mitochondrial membrane respiratory chain NADH dehydrogenase complex I. Complex I plays an important role in the transfer of electrons from NADH to the respiratory chain, a process that is essential for cellular respiration.
