

PGE synthase (I79) polyclonal antibody

Catalog: BCP01297

Host: Rabbit

Reactivity: Human,Mouse,Rat

BackGround:

Prostaglandin E synthase (PGE synthase), also known as FIG12 and MGST1-L1, is a member of protein super family MAPEG, which consists of membrane associated proteins involved in eicosanoid and glutathione metabolism. The expression of this membrane-associated protein can be induced by the pro-inflammatory cytokine, IL-1 β . PGE synthase is expressed in seminal vesicles, deferent ducts, kidney, heart and spleen. The enzyme activity of PGE synthase in most organs is glutathione-dependent. PGE synthase may play a significant role in the progression of Alzheimer's disease.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

~17 kDa

Swiss-Prot:

O14684

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500~1:1000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

PGE synthase (I79) polyclonal antibody detects endogenous levels of PGE synthase protein.

DATA:

Western blot (WB) analysis of PGE synthase (I79) polyclonal antibody at 1:500 dilution

Lane1:NIH-3T3 whole cell lysate(40ug)

Lane2:Hela whole cell lysate(40ug)

Lane3:H9C2 whole cell lysate(40ug)

Lane4:SP2/0 whole cell lysate(40ug)

Note:

For research use only, not for use in diagnostic procedure.
